Breast Cancer Rehabilitation

Physical Therapy & Rehabilitation with Breast Cancer

Cancer treatments can compromise a persons' quality of life. Physical Therapy can benefit the person with cancer during all stages of treatment and recovery by minimizing the side effects of cancer treatments and optimize the healing process. If you or someone close to you is experiencing any of these symptoms, physical therapy may be just what is needed.

- Pain
- Muscle Weakness
- Lymphedema
- Deconditioning
- Loss of Balance/Falls
- Decreased Flexibility
- Decreased Joint Motion
- Sensory Changes

Did you know...physical therapy can help?

- Pain Management
- Regaining Mobility
- Strength Training
- Flexibility
- Fatigue Management
- Cardiovascular Training
- Scar Tissue Mobilization
- Home Exercise Program
- Lymphedema Education

PHYSICAL THERAPY is effective in addressing these symptoms and more in order to assist you in getting back to being YOU!

NO ONE FIGHTS ALONE

PHYSICAL THERAPY SPECIALISTS CAN HELP

The therapists at PTS are trained in breast cancer rehabilitation and will address your concerns, along with what your body needs to return to optimal function.

Once all goals have been achieved, we can help establish a cardiovascular and strengthening program that can be continued at home or fitness center.
